

BONDADA JOSHMITHA SAI MANI HASINI

8688155534 | hasinibondada25@gmail.com | [Linkedin](#) | [Github](#) | [Leetcode](#)

PROFESSIONAL SUMMARY:

Aspiring Software Engineer with strong skills in Java, Full Stack Development, Machine Learning. Experienced in building scalable web applications and AI-driven solutions using Java, Python. Passionate about problem-solving, continuous learning, and developing impactful software solutions.

SKILLS:

Languages : Java, Python, JavaScript

Frontend : HTML, CSS, React.js

Backend : Node.js, Flask

Database : MySQL, MongoDB

Tools & Platforms : Git, Github, VS Code, MongoDB Atlas

Concepts : OOP, Machine Learning, REST APIs, Cybersecurity Basics

PROJECTS:

Aero Twin AI – Airport Digital Twin & Analytics Platform ([Link](#))

Tech Stack: React.js, Node.js, MongoDB, REST APIs

- Designed and developed an Airport Digital Twin system that digitally replicates airport operations, enabling real-time monitoring of flights, terminals, gates, and passenger flow.
- Implemented visualization dashboards to display operational metrics, airport statistics, and performance indicators through an intuitive user interface
- Incorporated AI-based analytics to predict delays, optimize airport resources, and generate actionable insights for improving operational efficiency and passenger experience.

Phishguard AI – Email Phishing Detection System ([Link](#))

Tech Stack: Python, Machine Learning, NLP

- Achieved 94% phishing detection accuracy using NLP and machine learning classification techniques.
- Improved model performance through advanced feature extraction and email preprocessing methods.
- Enabled real-time phishing email analysis to strengthen threat detection and reduce cybersecurity risks.

Vulnerability Scanner - Security Assessment Tool ([Link](#))

Tech Stack: Python, Flask, HTML, CSS, JavaScript

- Built a web-based vulnerability scanner to identify common website security issues and misconfigurations.
- Automated security assessment and report generation with severity-based risk classification.
- Developed an interactive dashboard providing actionable remediation recommendations for detected risks.

CERTIFICATIONS:

- Cloud Architecting and Cloud Foundations - AWS Academy
- MERN Full Stack - Unstop
- Java with AI - Unstop
- Beginning Python - Infosys Springboard
- Smart Cities - NPTEL
- Essential SQL Skills for Data Beginners - Analytics Vidhya

EDUCATION:

Bachelor of Technology (Civil Engineering)

SRKR Engineering College , Bhimavaram

2023-2027 | CGPA : 7.78

Intermediate (Class XII) - MPC Stream

Sasi Junior College , Tanuku

2021 - 2023

INTERSHIPS:

Cybersecurity Virtual Internship – Thiranex Platform

- Gained practical knowledge in Cybersecurity concepts, vulnerability assessment, and secure application practices.
- Worked on security-related tasks and learned fundamentals of threat detection and risk mitigation.

AWS Cloud Virtual Internship – EduSkills

- Acquired foundational knowledge of cloud computing concepts and AWS cloud services.
- Learned cloud deployment, storage, and basic cloud infrastructure management techniques.

ACHIEVEMENTS:

- Secured **Rank 122** in the **Unstop Week-of-Wins Challenge** and consistently achieved competitive rankings across multiple problem-solving contests.
- Earned **14+ certifications** in Cloud Computing, Artificial Intelligence, Cybersecurity, Full-Stack Development, and Database Management.
- Designed, developed, and deployed 3+ end-to-end projects in AI, Cybersecurity, and Analytics, leveraging technologies such as React.js, Node.js, Python, Flask, Machine Learning, and REST APIs.
